Election/Restrictions

2. Restriction to one of the following inventions is required (35 U.S.C. 121)
 - I. Claims **1-30, and 61** for a computer-implemented method to price a product, classified in class 705, subclass 400.
 - II. Claims 31-60, and 62 are drawn to a system to price a product, classified in class **705**, subclass **28**.

The 2 above inventions are distinct, each from the other because of the following reasons:

3. Inventions I and II are related as process and system for pricing practices. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different system or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case, the claimed system can be utilized for inventory managements including generating a GUI and showing in-stock products from a stored database, not necessary to be used for pricing a promotional product.
